[appendixE.pdf](#)
[appendixI.pdf](#)

Jeremy, Patrick and Nidhi,

You may have already read these documents, but I thought it might be helpful to point you to the two EE/RE SIP Roadmap Appendices that discuss baseline emissions projections and emission quantification methods for NAAQS SIPs. If you give a quick peruse, you'll notice the step-wise style these documents have and it would be great if you all could formulate the TSD information in a similar step-like style for the Projecting CO2 Performance State Plans TSD.

Best,

Robyn (Kenney) DeYoung
